### Update on Centennial Boulevard Extension Project

The City of Colorado Springs is undertaking a project to extend Centennial Boulevard from Fillmore Street to the Interstate-25/ Fontanero Street interchange. This important roadway extension will provide much needed connectivity and mobility options to the west side of Colorado Springs as well as alleviate traffic congestion along Fillmore and Chestnut streets. Planned by the city for more than 30 years, the Centennial Boulevard extension was originally anticipated as a six-lane principal arterial to address travel demand between the Garden of the Gods Corridor and downtown. As land use and growth conditions evolved over time, the City reclassified the Centennial Boulevard Extension as a four-lane minor arterial.

The extension project was included in the original Pikes Peak Rural Transportation Authority (PPRTA) program as a "C-list" project, but was not funded as other priorities took precedence. With increased development in the area and the growing need for this connection, it is on the PPRTA extension "A-list" of projects approved by more than 80 percent of the voters in 2012.

As the design phase continues, the project team has been meeting with property owners closest to the planned alignment seeking input on their property access as well as landscaping, lighting, connections and aesthetic treatments in the stretches of the new road nearest to their homes.

## Project Schedule

**Mid 2016:** Preliminary Design - Design advancement of the preferred alternative

Goal of this phase: Define right-of-way/easement impacts and project costs

**Late 2016:** Final Design - Obtain feedback from the preliminary design and evolve into further design advancement of preferred alternative

Goal of this phase: Refine design and develop construction documents

**2017:** Construction Phase - Incorporate comments from Final design and prepare final construction documents

City of Colorado Springs, 30 S. Nevada Ave., Suite 202, Colorado Springs, CO 80903
